Blended Learning: The New Norm – Lyceum of the Philippines Parvatibai

For Dec 15, 2021 · In my previous discussions, the challenges of online learning were examined, with a tentative consensus being shown in favor of blended learning, while the shortfalls in such pedagogical models Blended Learning (BL) is an education program that combines online digital media with traditional classroom methods. It requires the physical presence of both teacher and student, with some element of student control over time, place, path, or pace. While students still attend "brick-and-mortar" schools with a teacher present, in-person classroom practices are combined with online classes (via a computer, phone, or tablet) during remote learning. The blended learning model is a hybrid approach that combines online and in-person learning to accommodate the needs of students and teachers. It allows for a flexible learning environment that can be tailored to individual student needs.

During the pandemic, many schools and educational institutions have shifted to online learning, which has highlighted the benefits and challenges of blended learning. Blended learning can be particularly effective in language education, as it allows for a combination of face-to-face classroom instruction and online resources, such as language learning apps and platforms. This approach can help students develop language skills in a more personalized and engaging way.

In conclusion, blended learning is a promising approach that can be adapted to different educational settings, and it offers a flexible and effective way of teaching and learning. As technology continues to evolve, the possibilities for blended learning are endless, and educators will continue to explore and adapt this approach to meet the needs of their students.
